Project Summary

This document is intended to provide a summary understanding of the high-level vision of your project goals.

Company Name/ Team Name	Group DIAS
Company Address	(if applicable)
Company Website	(if applicable)
Telephone	(if applicable)
Company Contact/ Team member names	Andres Sanchez Daniel Quach Sara Mosquera Israel Osunkoya
Title	(if applicable)
Company Email/ Email address for all team members	Andres Sanchez: 101475675@georgebrown.ca Daniel Quach: 101384549@georgebrown.ca Sara Mosquera: 101512887@georgebrown.ca Israel Osunkoya: 101499955@georgebrown.ca
Telephone	437 673 1317
Project Title	ParkSpot
Project Description	**About the company:** Group DIAS is an association of four GBC students that take on society's necessities and find a solution to it. The team is dedicated to developing innovative, community-focused projects that address key social challenges. By combining their diverse skills, they aim to create tangible and sustainable changes. **About the project:** *ParkSpot* is a mobile platform designed to solve the everyday frustration of finding parking in busy neighborhoods. The app allows Businesses and/or Apartment buildings to list their unused parking spaces—such as driveways, evening-only spots, or weekend lots—for short-term rental. Drivers can search, reserve, and pay for these spaces near them directly through the app. By focusing on availability, location, and time windows, ParkSpot acts as an "Airbnb for parking," providing a convenient solution for drivers while creating passive income opportunities for space owners.
Problem/ Opportunity Assessment *	*Please describe current state problem/opportunity that describes the nature and extent of the problem (factual, quantified, concise), or that outlines a chance for advancement or progress.*
	1. In urban areas, drivers waste significant time and fuel circling to find available parking. 2. Many households and businesses have unused parking spots that could generate extra income but remain untapped. 3. There is a lack of community-focused platforms that directly connect people who need parking with those who have spare spaces.
Desired Project Outcomes/ Requirements*	*Define how this project shall address a business need, e.g. the business problem or opportunity described above; describe what the beneficiary must be able to do / receive from the solution*

	1.	A platform where parking spot owners can easily list available spaces with details such as location, price, and time windows.
	2.	A search and reservation system for drivers to find and book available spots in real time.
	3.	Secure payment integration that handles transactions between space owners and drivers.
	4.	A confirmation and navigation feature that directs drivers to their reserved parking spot.
	5.	A notification system to remind users when their parking time is about to expire and offer extensions.
	6.	Automated grace period management, additional charge processing, and escalation to customer care if overstays continue.
	7.	Terms and Conditions integration to ensure legal clarity and avoid disputes.
Key Deliverables to be produced by students*	*Define the boundaries of work that you expect to receive from the students effort (vs. internal effort)*	
	1.	A working prototype of the ParkSpot web/mobile platform.
	2.	User authentication system for both spot owners and drivers.
	3.	Core features: spot listing, search and booking, payment integration, and reservation confirmation with navigation support.
	4.	Notification and alert system for reservation expiry, extensions, and penalties.
	5.	Grace period and overstay handling with automated charge application.
	6.	Customer care dashboard for escalation and tow truck requests.
Desired Start Date	12/09/2025 (D/M/Y)	
Desired End Date	01/04/2026 (D/M/Y)	
Attachments	*List attachments that support project description*
