# 1 Introduction

The project vision is a document that gives a high-level overview of the ParkSpot project, highlighting its purpose, scope and key components. It is a fundamental guide for the project's development and will be used by all team members and future stakeholders to make sure that the understanding of the vision and goals is shared.

## 1.1 Purpose

The purpose of this project vision document is to define and articulate the high-level vision and goals for the ParkSpot project. It will serve as a central reference to guide the development team, future stakeholders, and other relevant parties, ensuring that all efforts are aligned with the project's objectives.

## 1.2 Scope

This document describes the scope of the ParkSpot project, which aims to develop a mobile platform for renting out unused parking spaces.

### 1.2.1 In Scope

The following areas are within the project's scope:

a) A mobile platform for the ParkSpot project
b) A user authentication system for parking space owners and for drivers
c) A notification and alert system for reservation expiry, extensions and penalties
d) Grace period and overstay handling with charge application

### 1.2.2 Out of Scope

The following are outside the project's scope:

a) Full-scale commercial launch and marketing of the project
b) Advanced map features, besides basic navigation to the reserved parking spot

## 1.3 Definitions, Acronyms, and Abbreviations

<This subsection provides the definitions of all terms, acronyms, and abbreviations required to properly interpret the Project Vision document. This information may be provided by reference to the project's Glossary>

*This section explains all of the terms and abbreviations that are being used in this document, for those who are unfamiliar with them. Not everybody who reads this document will understand all of the terms, so this section is helpful.*

| Term | Explanation |
|---|---|
| ParkSpot | The name of the project and the mobile application platform |
| GBC | George Brown College |
| Space Owners | The users who list their unused parking spot for rental purposes |
| Drivers | The user seeking a parking spot |
| Urban drivers | The sum of the city's frequent drivers, visitors, tourists, and new incoming drivers. |
| | |
| | |
| | |

## 1.4 References

*<This subsection provides a complete list of all documents referenced elsewhere in the Project Vision. Identify each document by title, report number if applicable, date, and publishing organization. Specify the sources from which the references can be obtained. This information may be provided by reference to an appendix or to another document>*

# 2 Positioning

## 2.1 Business Opportunity

Parkspot aims to take advantage of a significant market opportunity in urban areas where there is a high demand for parking and a large number of underused parking spaces(owned parking spots). The business opportunity is to create a platform that efficiently connects these two groups, creating income for space owners and providing a service for drivers.

## 2.2 Problem Statement

The following problem statement table summarizes the core issue the project tries to solve.

| | |
|---|---|
| The Problem of | Drivers waste significant time and fuel searching for available parking spots in urban areas |
| affects | Urban drivers |
| The impact of which is | Increased frustration, traffic congestion, wasted resources, and untapped income-generating potential. |
| A successful solution would be | A platform that provides a convenient and reliable way for drivers to find and reserve parking, while enabling space owners to generate passive income from their unused spots. |

**Table 1 Problem Statement**

## 2.3 Product Position Statement

The following table defines the product's positioning in the market:

| | |
|---|---|
| For | Urban drivers and parking space owners. |
| Who | Are frustrated by the lack of parking and the underused parking spots, respectively. |
| The ParkSpot | is a web/mobile platform |
| That | Provides a simple way to find and book parking or rent out an unused space, acting as an "Airbnb for parking". |
| Unlike | General parking apps or traditional parking garages |
| Our product | Focuses on utilizing existing, often overlooked, private parking spaces and promotes a community-driven solution |

**Table 2 Product Position Statement**

## 2.4 SWOT Analysis

| **Strengths** | **Weaknesses** |
|---|---|
| Comprehensive Core Features | Lack of Brand Equity |
| Clear Target Groups | Lack of Experience |
| Innovative approach | Lack of Financial Capital |
| **Opportunities** | **Threats** |
| Need for Urban Mobility Solutions | Intense Market Competition |
| Strategic Partnerships | Regulatory and Legal Hurdles |
| | Mobile App Security Risks |

# 3 Stakeholder and User Descriptions

a) Parking Space Owners: Businesses and Apartment Buildings with underutilized private parking. They lack an easy, automated way to monetize their unused spaces.
b) Urban Drivers: Vehicle owners needing short-term parking in busy neighborhoods.The "everyday frustration of finding parking"—wasting time, fuel, and reducing congestion
c) Group DIAS: The student team (Group DIAS) acting as the project's sponsors and developers. They are targeting a significant social challenge: urban parking insufficiency.

## 3.1 Stakeholder Summary

The project stakeholders are individuals or groups with an interest in the development and outcome of the project.

| Stakeholder Name | Represents | Role |
|---|---|---|
| Group DIAS | The project development team | Responsible for the design, development, and delivery of the ParkSpot prototype |
| Urban Drivers | The end-users of the application who need parking | Provides feedback on user experience and functionality |
| Parking Space Owners | The end-users of the application who have spaces to list | Provides feedback on the listing and income management features |

**Table 3 Stakeholder Summary**

## 3.2 User Summary

The following table summarizes the identified users of the system.

| User Name | Description | Responsibilities | Stakeholder |
|---|---|---|---|
| Driver | An individual seeking a temporary parking spot in an urban area | Searching for spots, booking, paying for reservations, and using navigation features. | Urban Drivers |
| Space Owner | A business or individual with a private parking space to rent out. | Listing their spot, managing availability, setting prices, and receiving payments | Parking Space Owners |
| | | | |

**Table 4 User Summary**

# 4 Stakeholder Requirements

The following requirements are based on the needs of the stakeholders and users.

| ID | Requirement | Stakeholder |
|---|---|---|
| SHR-1 | The platform must allow space owners to list available spaces with details like location, price, and time windows. | Parking Space Owner |
| SHR-2 | The platform must allow drivers to search, reserve, and pay for spots in real time. | Drivers |
| SHR-3 | The platform must provide secure payment integration for transactions. | Driver, Space Owner |
| SHR-4 | The platform must confirm reservations and provide navigation to the reserved spot | Drivers |
| SHR-5 | The platform must notify users when their parking time is expiring | Drivers |
| SHR-6 | The system must handle overstay penalties and apply additional charges automatically. | Driver, Space Owner |
| SHR-7 | The system must include terms and conditions to ensure legal clarity. | Team DIAS |

**Table 5 Stakeholder Requirements**

# 5 System Features

The following system features are high-level capabilities required to meet the stakeholder requirements.

| ID | Feature | Stakeholder Requirement ID |
|---|---|---|
| SF-1 | User Authentication System | SHR-1, SHR-2 |
| SF-2 | Spot Listing & Management | SHR-1 |
| SF-3 | Search, Booking & Payment | SHR-2, SHR-3 |
| SF-4 | Reservation & Navigation | SHR-4 |
| SF-5 | Notification & Alerts | SHR-5 |
| SF-6 | Overstay Handling & Penalties | SHR-6 |

| ID | Feature | Stakeholder Requirement ID |
|---|---|---|
| SF-7 | Customer Care Dashboard | SHR-6 |

**Table 6 System Features**

# 6 Assumptions

The following assumptions have been made during the creation of this document.

a) Users have access to a reliable internet connection to use the web/mobile platform.
b) Secure and reliable payment gateways are available for integration.
c) GPS functionality is available and enabled on user devices for navigation features.

# 7 Constraints

The following constraints may impact the project's development and delivery.

a) Time Constraint: The project has a fixed timeline, with a desired start date of September 12, 2025, and an end date of April 1, 2026.
b) Resource Constraint: The project will be developed by a team of four students.
c) External Dependency: The project depends on third-party services for payment processing and mapping.
